IN THE CLAIMS:

1-6. (Cancelled)

7. (Previously Presented) A rubber composition, comprising:

a base polymer consisted of (A) 20-99 weight parts of high cis polybutadiene synthesized

in the presence of a cobalt-based catalyst and having a Mooney viscosity of 50-70 and a

molecular weight distribution (Weight average molecular weight (Mw)/ Number average

molecular weight (Nw)) of 2.5-3.8, and (B) 80-1 weight part(s) of high cis polybutadiene

synthesized in the presence of a non-cobalt-based catalyst and having a Mooney viscosity of 30-

70; and

a crosslinking coagent.

(Previously Presented) The rubber composition according to claim 7, wherein said (A) 8.

high cis polybutadiene has a ratio (Tcp/ML) of 2.0-5.0 between the 5% toluene solution viscosity

(Tcp) and the Mooney viscosity (ML), and a cis-1.4 content of 95 % or above.

(Previously Presented) The rubber composition according to claim 7, wherein said (A) 9.

high cis polybutadiene has a weight average molecular weight (Mw) of 550-700 thousands and a

number average molecular weight (Nw) of 150-300 thousands.

Serial No.: 10/565,427

10. (Previously Presented) The rubber composition according to claim 7, wherein said (B)

high cis polybutadiene is synthesized in the presence of a nickel- or neodymium-based catalyst

and has a cis-1.4 content of 95 % or above.

(Previously Presented) A golf ball comprising a rubber base material having said rubber 11.

composition according to claim 7.

12. (Previously Presented) A rubber composition, comprising:

a base polymer consisted of (A) 20-99 weight parts of high cis polybutadiene synthesized

in the presence of a cobalt-based catalyst and having a Mooney viscosity of 30-42 and a

molecular weight distribution (Weight average molecular weight (Mw)/ Number average

molecular weight (Nw)) of 2.5-3.8, and (B) 80-1 weight part(s) of high cis polybutadiene

synthesized in the presence of a non-cobalt-based catalyst and having a Mooney viscosity of 30-

70; and

a crosslinking coagent.

(Previously Presented) The rubber composition according to claim 12, wherein said (A) 13.

high cis polybutadiene has a ratio (Tcp/ML) of 2.0-5.0 between the 5% toluene solution viscosity

(Tcp) and the Mooney viscosity (ML), and a cis-1.4 content of 95 % or above.

Serial No.: 10/565,427

(Previously Presented) The rubber composition according to claim 12, wherein said (A) 14.

high cis polybutadiene has a weight average molecular weight (Mw) of 550-700 thousands and a

number average molecular weight (Nw) of 150-300 thousands.

(Previously Presented) The rubber composition according to claim 12, wherein said (B) 15.

high cis polybutadiene is synthesized in the presence of a nickel- or neodymium-based catalyst

and has a cis-1.4 content of 95 % or above.

16. (Previously Presented) A golf ball comprising a rubber base material having said rubber

composition according to claim 12.

(New) The rubber composition according to claim 10, wherein said (B) high cis 17.

polybutadiene has a ratio (Tcp/ML) of 3.0-5.5 between the 5% toluene solution viscosity (Tcp)

and the Mooney viscosity (ML).

(New) The rubber composition according to claim 10, wherein said (B) high cis 18.

polybutadiene has a ratio (Tcp/ML) of 3.0-5.2 between the 5% toluene solution viscosity (Tcp)

and the Mooney viscosity (ML).

Serial No.: 10/565,427

19. (New) The rubber composition according to claim 10, wherein said (B) high cis polybutadiene has a ratio (Tcp/ML) of 1.8-5.5 between the 5% toluene solution viscosity (Tcp) and the Mooney viscosity (ML).

20. (New) The rubber composition according to claim 10, wherein said (B) high cis polybutadiene has a ratio (Tcp/ML) of 1.8-5.2 between the 5% toluene solution viscosity (Tcp) and the Mooney viscosity (ML).

Serial No.: 10/565,427
